Education

Bundelkhand Institute of Engineering & Technology, Bachelor of technology in Information Technology — Nov 2022 – May 2026

- **GPA**: 8.07
- **Coursework:** Machine Learning,Artificial Intelligence,Database Management System, Data Analytics, Cyber Security, Data Structure & Algorithm.

Work Experience

AI & ML Intern | Evoastra Ventures Inc. — Feb 2026 – Mar 2026

- Built a **Supply Chain Demand Prediction System** using 3 ML Models: Random Forest, XGBoost, and Neural Networks with FastAPI + Streamlit and deployed using Docker
- Designed a scalable ML pipeline with 4 stages: feature engineering, dashboard analytics, and Docker deployment
- Delivered a real-time prediction system enabling efficient demand forecasting and decision-making 100% environment reproducibility and seamless integration

ML Intern | Suvidha Foundation

- Developed a **50+ metric evaluation pipeline** (ROUGE, BERTScore) for news summarization analysis
- Applied statistical testing and clustering to validate improvements across datasets
- Improved semantic quality (+12.5%) and reduced redundancy by 97%.

Technical Skills

- **Languages:** Python, C++, SQL
- **ML & Libraries:** Scikit-learn, PyTorch, Transformers, SpaCy, OpenCV, LangChain, LangGraph, RAG.
- **Backend:** FastAPI, Flask, REST APIs.
- **Tools:** Git, Docker, Postman, Jupyter Notebook, Google Colab
- **Database:** VectorDatabases, MongoDB, PostgreSQL, SQLite.

Projects

EduTrackAI – Compliance Monitoring System — Link

- Devised an AI-based institutional compliance and risk assessment platform that helps education regulators and colleges evaluate submitted documents, rank institutions (about 5446), and identify high-risk cases faster.
- Generated a 3-layer decision-support workflow using OCR-based document validation, compliance scoring, and ML-driven anomaly detection to convert raw institutional data into explainable risk scores, and review flags.

DOMAIN_WATCH: AI_ DNS_THREAT_ANALYZER — Repo

- Implemented an AI-driven DNS threat detection system to identify malicious domains in real time by analyzing live DNS traffic and classifying activity into 4 categories as benign, suspicious, DGA-based, or fast-flux.
- Created an end-to-end pipeline combining packet sniffing, domain feature extraction, machine learning models, and heuristic fast-flux scoring to improve detection accuracy beyond 1 rule-based monitoring alone.

Certifications & Achievements

- Solved **500+** Data Structures and Algorithms problems; achieved **Knight** rating on LeetCode Profile
- Earned the **Oracle Cloud Infrastructure AI Foundations Associate** certification 2025, demonstrating proficiency in core AI/ML concepts and cloud-based AI services. Certificate
- **Tested 5+** RESTful APIs using **Postman**, ensuring correctness, and seamless backend integration. Certificate
- Led a team that secured **Top 6** position at **Smart India Hackathon 2025** (Software Edition) by delivering an AI-based compliance monitoring system (**EduTrackAI**). View Post
- Completed the AI Agents Intensive Program 2025 by **Google** (via **Kaggle**), focusing on autonomous agents, tool orchestration, and LLM-driven workflows. Certificate
